

Annual Resurfacing Project

Staff identified Bake Parkway between Portola Parkway and Lake Forest Drive for the next cycle of pavement resurfacing. The project includes removal of deteriorated pavement, replacement of some areas of sidewalk and curb and gutter, application of cold mill on the pavement shoulders, and placement of a two-inch asphalt rubber cap with new traffic striping and pavement markers. The bid opening occurred in June, with R. J. Noble Company being the apparent low bidder. Construction started in August and is nearing completion in late October 2014.
